

PATHE GAZETTE: 42/30. (DUBLIN)

RAT TRAILER

The rat under cover of the black-out and profiting by ruined buildings, are forming the menace of an enemy within our gates. If you saw this you would soon stop it, but in effect it happens when the rat has already shared our food in the larder and they always choose the best there is. But you can prevent it by shutting those windows, by closing those doors, by firmly closing those dustbin lids, by clearing away office rubbish at night, by never leaving the pet's food about. Anything stacked in corners or against walls makes a comfortable fortress for the rat who is too careful to consume stores placed in the middle of the room. Go to your Local Authority or the Town Hall, they need your co-operation. The rat is a public enemy. He takes our food and endangers our health. If there are rats in your home or business premises, please let us know. We can help you to rout the rats.
