NEW HAIR DO. (LANA TURNER.)

Film star Lana Turner tries a new style of hair do which she said is as easy on the head as the eye, it certainly suits her. The idea is to heap up the curls just a little to the left of the crown, that is if you've got any curls to heap up. There they are, heaped up in grand profusion. It's all done by kindness and curlers, especially curlers. Of course, you only get the full effect when you're dressed to match, rather swift don't you think? What do you think of the back? All you have to do now, ladies, is copy Lana, so up with those curls.
