

SALVAGE TRAILER

The things you used to throw away, will live to fight another day and they are more quickly in the fight, if you sort them right. Paper bags and cartons, old newspapers and bills, put them by and keep them dry, don't make them into spills. Letters from Daisy and letters from Jack, don't be lazy tie them in a stack. Large rags, small rags, the worn out mat, stockings and trousers and last year's hat. Tie them in a bundle just like that. Buckets and pails, kettles and grids, rusty nails and saucepan lids. Iron, tins, frying pans, leaking bins and leaking cans, find a box and put them in it, it will only take a minute. Bicycles, bedsteads and anything large will be collected free of charge. Bones are vital, we want a lot, dry them while the oven's hot. Find a cardboard box or tin, take the bones and pop them in. Bones keep best if ventilated, so see the lid is perforated. Rubber gloves and rubber sponges, tennis balls and ends of bungs, garden hose and tubes and washers, worn out soles and old galoshes, bath mats, bathing caps and stoppers. Ma's hot-water bot. and Papa's. Late arrivals, that's the stybe, stack them neatly in a pile. Salvage sorted into groups, helps the country, helps the troops. So hark to the collector chap, hi, Mrs. mobilise your scrap.
