### AIRCRAFT CARRIER'S SWIMMING POOL.

Some of Uncle Sam's Aircraft Carrier boys are in the swim, using the protected area inside the torpedo nets as a swimming pool. Even Pacific waters converted into a pleasure ground for a change. Low level diving is from a springboard, while those with a head for height, take-off from the flight deck.

The anchor chain provides a little novelty for dive bomber pilots who like to take their sport as well as their worky head down.
