SALVAGE OF BONES - TRAILER

What, burying a bone, I'm ashamed of you Rover, prolonging the war when we all want it over. Once you have finished your bone, though it's no use to you, the factories can make from it explosives, glue, oil for the engines and animal feed and the bone fertiliser that farmers all need. Don't forget that the bone has to be dried very proper. Remember these words, never waste one small bone. Now Rover, do you hear, 50,000 tons are wasted each year. Pick it right up like a good little chap, that's right. Understand?
