U.S. BOMB AIMERS AT SCHOOL.

U.S. Army airmen are inducted into the Society of Axis exterminators, as more bomb-aimers join the air force. An honour man or high exterminator is borne aloft, to join the boys in a post-graduate exhibition to show what they can do. The multiple store idea extends to the bomb dump where the volatile groceries come from. 100 lb practice bombs are released over the target range.

Down below is a specially constructed enemy harbour.

Nothing succeeds like success. Now show what more you can do to wipe out what these three stand for.
