

TITLE.:- ENDURANCE FLIERS DOWN

Picture.:- After its record-smashing flight of over three weeks, the "City of Chicago" lands at Sky Harbour and the record breaking Hunter brothers once again join their family who have watched the long flight with mixed feelings.

The crowd would have mobbed the fliers - but were restrained, and the plucky brothers escorted to a roof whence they acknowledged the plaudits of the people.

They appear to have stood the strain of 23 days of roaring engines quite well, don't they ? But, oh they are very weary !

TITLE.:- AERIAL ACTIVITY.

Picture.:- If your heart is weak I strongly recommend that you give your eyes a rest while these intrepid people thrill us with daring deeds 60 feet above the ground.

Here they go putting up one of the most exciting performances seen for some time.

The bike leaves the rickety track as they go faster.

Now ! watch the cyclist - One-two-three-four-five-six-seven - Whoo ! And that would be just seven too many for me.

These are the three people who live by flirting with death

TITLE.:- U.S. BATTLESHIPS VISIT.

Picture.:- It is not often that we receive a visit from units of Uncle Sam's navy.

Unfortunately when these vessels, the Arkansas, the Utah and the Florida arrived, the weather was at its worst, so that those on board had a very unfavourable first impression of Great Britain.

Lets hope that the warmth of their reception by the people will do much to dispel that impression.

These ships bring nine hundred midshipmen from the Naval Academy at Annapolis - the cruise being an educative one arranged for their benefit.

Here they are coming ashore near the great Forth Bridge - they look like a storming party as they clamber over the sea-wall eager to see the sights.

It is to be hoped that the sun will shine aplenty before their visit is over.
