TITLE.:- HAIR RAISING MYSTERY.

Picture.:- Can you make it out ? These young ladies do not appear to be seeing anything particularly blood-curdling, yet, as you see, their hair is most certainly standing on end - in fact they are having the greatest hair-raising experience of their lives. Let me explain -

That film was upside down - and so were the girls !

This is what happened before the film was taken. Of course, as they were gently lowered into position, gravity caused their locks to assume the upright or rather the downright.

Now, I expect you would like to see these girls as you first saw them. Well, here they are, still doing their hair-raising act !

TITLE.:-FIRE FIGHTERS FETE.

Picture.:- When the dread alarm is given our fearless fire fighting forces lose no time in getting into action.

Here an escape crew demonstrates how quickly a fire escape can be got into position and raised to its fullest extent.

This done, a fireman dashes up to the top of the tower - just as he would do at a real fire - shortly to re-appear with what might, under other circumstances, be "beauty in distress" flung across his shoulders; but in this case it is not exactly a beauty.

Then - a "steamer" crew shows us how smart they can be; running out the hose with commendable celerity.

Their object is to knock over with jets of water the three round targets in the foreground.

Watch them fall ! Number one is over - then number two and then three. Good work !
