

13152-C
13152-C

TITLE.:- CYCLING AT HERNE HILL.

Picture.:- An unusual feature of this race is the fact that it is opened with what is known as a "rolling start" One half of the competitors are sent off - they complete one full lap of the course - and as they approach the other half - they also are despatched.

In this instance a thrilling race was the result - and the two halves soon intermingled.

Here's the finish - Southall only just doing it !

This is the winner looking very fit, just after the race.

TITLE.FYROTECHNICS AT THE PALACE.

Picture.: Whoops of joy greeted the fireworks as their brilliance shattered the darkness.

Here's a "bright" little incident - not forgetting "Arry and his Moke".

This spectacular fire-picture represents a Battle of the Future with warships and aircraft in action. Notice the bombs dropping from the airships.

Here's a "glowing" tribute to their Majesties and the Prince of Wales.

And finally, we see a great waterfall of light, brilliantly illuminating the countryside for many miles around.

COMMENTATOR.:- Well ! Cheerio everybody ! We'll be with you again in a few days.

TRADE MARK.: "UNIVERSAL TALKING NEWS"
