(3). TITLE.:-TIME SAVING.

Picture.:- By the old method, coaling a tender would take best part of an hour -- but now the whole operation is completed in less than two minutes.

Here you see a truck containing twenty tons of coal being hoisted by this powerful apparatus.

It takes rather more than a minute to reach the top-

-where the truck, with its contents, is slowly tilted, causing the coal to be thrown into a huge bunker inside the contrivance. One does not often see a railway truck upside-down. I never did until now.

From the bunker the coal passes into the tender.

And so another great railway engine is re-fuelled ready for a run to almost anywhere.

(4). TITLE.:-THE CONQUERING HEROINE.

Picture.: Tens of thousands turned out to see "our Amy" -- or rather "Johnnie", as she prefers to be called, when she drove through the West End of London.

Other famous young women follow the Air Girl on her drive of triumph.

Here's another "shot" taken in Northumberland Avenue -- Amy is seen standing in her car happily waving acknowledgement of the greetings showered upon her by the great crowd of well-wishers.

Well, she deserves the best that Britain can give.
