(7).

TITLE.:- UNDERSEA ROBOT.

Picture.:- The inventor says that this is what a well-dressed man should wear on the bed of the ocean.

He would unquestionably, be a "heavy"swell.

The inventor pays a short visit to Davy Jones, and then he and his sixteen-hundred-pound suit of plus fours (new style), -- are hoisted out of the water into the accompanying boat, where with the aid of various tools, including a tin-opener, he is released.

An apt name for these particular articles of wearing apparel would, it seems be "step-outs" -- but as far as I'm concerned they can be "throw-outs"

(8).

TITLE.:- S.O.S.

Picture.:- Girls ! gaze on the results of Sun, Oranges, and Sea-bathing.

They certainly seem to have made Miss Smock look to be in good form.

Although she doesn't smoke or drink she does most of the other things girls of her age do.

She's nearly nineteen and gets quite a lot of fun out of life -- You know, I just hate to see her going swimming by herself !
