

(4). TITLE.:- A BOY'S PARADISE.

Picture.:- This merry-go-round is an exact copy of the real thing. It contains three thousand parts and took nearly two years to make.

Mr. Todd, the maker, shows us the works -- He is more than particularly proud of the organ.

Naturally tiny aeroplanes prove to be of great interest to youth --

--while a model of H.M.S. Hawkins is responsible for at least three messages being delivered late.

Here's the real midget of the show. Look ! We hand you a surprise ! The engine is only two inches long.

Unlike those messenger boys -- it's an express !

Rather a contrast is this powerful model which hauls a load of seven passengers. Altogether a very interesting exhibition.
