

(2)

TITLE.:- ON THE ROCKS.

Picture.:- Another tragedy of the sea ! This big ship the "City of Osaka" ran ashore, in a dense fog on a treacherous bit of the coast between Collieston and Whinnyfold, Aberdeenshire.

There are few more tragic sights than a ship on the rocks.

She's a 6,000 tonner of the Ellerman line. She carried no passengers, and the crew were rescued by breeches buoy before daylight. The "City of Osaka" was bound from Newcastle to New York -- but it is practically certain that she will never get any farther than this.

Treacherous reefs of rocks run far out to sea on this wicked coast, and those who know the district shake their heads when asked if the ship will be able to get clear from the rocks which imprison her on both sides. The very latest news is that the ship is settling down fast.

(3).

TITLE.:- A TWENTY-TON GIFT.

Picture.:- We're in America now, and this twenty-ton bell has been brought to New York from London. So you can bet it's good.

There it goes, right up the face of that mighty edifice, which is the Riverside Church. It's got a long way to go !

Higher and higher, up she goes ! Next stop, Top Floor !

Now she takes a swing straight into the open arms of fitters waiting right up there near the stars.

She's now in her last resting place, but by no means dead. With seventy companion bells she'll make the world's greatest carillon --

--and will broadcast many a happy event to the big city.
