

(9). TITLE.:- IT'S WINTER NOW.

Picture.:- Ski-ing's a great sport -- if you know how. These hardy young people want to be ready when the snow comes. So they learn how to handle --

--or should it be "footle" (?) the long wooden snow-shoes.

You can't be graceful in these cumbersome things, no matter how hard you try, but these girls --

--and fellows don't do so badly for learners. This turning is quite tricky, but has to be mastered, --

--if they're to really enjoy themselves on the snow-clad hill-sides.

Here's an idea for a new dance. It could be called --

--"The Winter Waddle". Somebody is sure to think it's the best yet !

Or they might prefer the "Bobbin' Blues". You never can tell !

When they finish with this course of training they are fit enough to tackle most of the more terrifying ski-runs in the country.

They prefer to learn in a crowd -- the idea being that it helps --

--them to gain confidence more quickly than individual tuition.

Now they're reckoned to be sufficiently expert to swank their abilities in public.
