

(6). TITLE.:- SOME PREFER GEESE.

Picture.:- Goose fattening is quite an industry at New Trebbin, and birds come from --

--all over Germany for final fattening ready for the table. They're all --

--unconscious that their grease will soon be running. Hundreds of thousands --

--of the birds are dealt with annually at this big farm --

--and they come in great batches of as many as a thousand a time.

Checking and sorting them is no mean task, for --

--there may be hundreds of different owners to be considered. And, of course, --

--careful feeding - particularly, just now, -- is a very, very important item in the --

--daily routine of the birds. They take their food --

--from a communal trough in quite an orderly manner.

This youngster makes a pet of one ! Or is it cupboard love ?
