(9). TITLE.:- SAY IT WITH LIGHTS.

Picture.:- Over thirty thousand lights go to make up this great animated Christmas Card - which somebody --

--called a "mean man's movie show". A brilliant star-lit night shows the way --

--to a winged Father Christmas, who hovers over the "City of Lights" showering happiness, in the form of toys, on a slumbering world of youth. This is the world's largest electric Christmas Card, and breaks out into brilliance as soon as daylight fades. When the flying Father Christmas has distributed all his good things, he goes back for more.

This is unquestionably a very, very attractive way of wishing the world "A Merry Christmas".
