

(5). TITLE.:- JOHN BULL'S BULLDOG.

Picture.:- It was a horribly misty day when this new unit was added to our navy, at the famous Wallsend Yard.

At the given word, a trigger is released below the new ship, --

X --and she glides down the slip-way. This is a remarkable launch, as H.M.S. Bulldog is in a very advanced state of construction. Her boilers and engines are already aboard, and her torpedo tubes and gun mountings are all in place.

She is the last of the eight replacement destroyers of the 1928 program.
