(6).

TITLE.:- BUSY DAYS AT G.P.O.

Picture.:- Near Christmas they have to <sup>go</sup> 'all out' to avoid being snowed under by the --

--mountains of parcels that pour into the post office every hour.

It's a terrific task, and must never be allowed to get --

--the better of them, otherwise the result would simply be chaos.

SUBTITLE.- THE SAME PROBLEM ETC.

In New York they are handling thirteen hundred tons of --

--mail every day. The sorters have to work at great speed to prevent congestion; --

--for parcels pour in just as quickly as they can possibly go out.

You have to be a very good "shot", before you can get a job in this department ! It must be a bulls-eye, every time.

Look at this slow motion 'shot'. Well aimed, sirs! Where did you learn that ?
