TITLE.:- WINTER'S MANTLE.

Picture. :- It's a beautiful sight, but --brrh -- it gives one the shivers to see all that snow about !

It's a tough job, trying to keep the roads clear. Snow ploughs are hard at work cutting, puffing, and blowing, in the effort. Here's a fine opportunity for me to get in --

--the "gag", that a plough has s'no use in winter!

(I've saved that one up ever since the summer) - In some parts they're managing to clear the roads a bit, but in --

--some places even railway engines can't do it. Look at this ! Ah !

This train is well embedded, and it's got to be shovelled out. A long --

--process but they get it moving at last. It's a chilly job, --

--for everybody but the engine driver ! We should grumble at the --

--weather we get! What about people in these parts - Brrh !
