(2). TITLE:- GOOD TIME COMING

(OPEN WITH SIREN OVER FIRST TWO SHOTS)

Picture.: Better days are indicated by news from Lancashire. Orders are coming in - and so are the operatives - to work !

Machinery is again playing its music. It sounds so sweet to those who have had a --

--thin time, hoping against hope for better days. Well it--

--looks as though things are improving, and that there's a good time coming, once more.

The world's "cottoning" on to cotton. This means work and happiness for the --

--workless, not in the cotton industry only, for when it leaves the mills --

--it has to be shipped. That, of course, means more work for someone. And so it goes on.

Let's hope the improvement will be maintained, and that Lancashire is really coming into its own again, at long last.
