

TITLE.:- MASSED DRILL.

Picture.:- They double in with a lightness of feet worthy of a team of ballet dancers ! They are all assistant instructors, and this shows what they will train others to do later on. They mark time, and at --

--the order, break into a rhythmic movement which certainly does credit to them and their teachers. Halt ! ..... Then once again, off they go !, performing evolutions, and revolutions, which would bring rounds of applause, if done by a trained chorus on the stage. "Order out of chaos" is --

--next demonstrated. See how smartly they fall in place. One's missing ! You're late, young man !

If they were all wound up to go by clockwork they couldn't be more exact than they are !

Human"see -saws", is a good name for this effort ! No wonder they say that the army of --

--to-day's all right ! Up ! Down ! Up ! Down ! - and - Up ! Over ! Not too quickly ! Good !
