TITLE:- NIGHT CAPS .

Picture:- Many people who drive cars in Paris have complained that they can't see the signals given by police after nightfall.

They will have no excuse after this; --

--for they will, at least, be able to see the Bobby's cap,--

--and armband. The white baton, too, will be seen. It's just possible it might also be felt, if need arises! I know I'll hurry to obey orders given to me!

It seems like a move in the right direction.
