(1). TITLE:- HYDRO GLIDER.

Picture:- She's a strange-looking affair, with an air-propellor, as means of propulsion.

It does its job very well, too ;, as can be seen by the way she glides over the water, answering --

--to the controls, which are in the capable hands of Comte de Lambert - the French airman.

The hydro-glider attains to a speed of nearly fifty miles an --

--hour, on this run. Here she comes, clearly demonstrating that it isn't absolutely necessary for a boat's propellor to be --

--under water. She's a very steady craft considering her speed, and it says much --

--for the inventor, that she gave satisfaction to all concerned on this run on --

--the river Seine. A peculiar looking boat - but one with real dash ;
