

15/12/51

TITLE :- MODERN AMAZONS.

Picture :- It's a welcome change from ordinary physical "jerks", more particularly as it makes for --

--suppleness and grace, rather than muscle. Fencing is an art - a "fine art" in fact, and one which is --

--extremely beneficial to the High School girls.

Now they learn work with the foils, --

--and they do very well with them, too ! Then they have to don --

--the fly-catcher-like shields, and all is ready for the fray.

Like real experts they --

--face each other, and under skilled --

--tutors, learn in ideal conditions, all there is to know about fencing.

You can't wonder that the pupils enjoy this particular lesson; --

--and happy are they when they have become masters - or perhaps I --

--should have said "mistresses" of the noble and very ancient art of fencing.
