

C-122221

(8). TITLE.:- AIRMINDED BRITONS.

Picture.:- Yes, they build them and fly them - but not in them ! It's --

--rather amazing how many people, young and old, go in for this interesting pastime, --

--nowadays. ... All sorts and conditions of these little aircraft are built --

--with every care and attention to detail. ... They start them --

--up in many ways. ... This chap uses a drill as prop swinger.

Away goes one of the tiny --

--machines. ... It puts up a very good show ! You know, that's going, for a model.

Off goes another, taking off like the real --

--thing. ... Some of them have stayed in the air for twenty --

--minutes, or more. ... Ha ! here's where "props cop" it !--

--(said he y "whist-fully") ... New squadron leaders are appointed by the Model Aeroplane Club. ...

Members will work under them in their plane smashing escapades in future !
