TITLE.:- ON TOP OF THE WORLD.

Picture. :- Visitors to the French Alps will welcome the re-opening of the rope-

--railway, for it means most of the delights of mountaineering without --

--its inconveniences. ... We're on our way up to Porvane. That's twelve --

--hundred feet further up ! ... We get some wierd moving picture effects, with, apparently, only part of the picture moving! ... It's four thousand --

--feet across a great abyss, and takes only eight minutes. A saving --

--of hours ! ... One gets plenty of oppportunity of studying the beautiful scenery. ...

Here we are at the journey's end. ... And now we can feast our eyes --

--on one of those glorious pictures "Prepared by Providence, with ne'er a flaw". ... A gorgeous scene. ... And now --

--for the return trip! ... As we swing along on our way, we --

--know we're safe, for there's a 12-ton weight at the top, as a--

--counterbalance. ... Here we are back again at our original starting point, which itself, is nearly a mile high ! ... That's a real ropeway!
