(8).

TITLE:- AQUATIC DRILL.

Picture:- In they go ! Sixty-four "mermaids", out --

--or rather, in, to show us a thing or two --

--about pattern making in the water. ...

Here's a rather striking design of floating femininity. ..
They've no chalk-marks --

--to go by, either. ... It must need --

--a lot of patience to weave these patterns on the --

--water. ... The girls themselves have great fun over
the whole --

--thing. ..Here's a very effective picture with --

"never a one" a victim to that sinking feeling ! That would
spoil it !

They perform a "mass retreat" as neatly as if they --

--were on their feet, on terra firma. ... They --

--are all business girls, and do this purely for --

--the pleasure they get out of it. ... Incidentally --

--anyone who is privileged to be present, can't fail to --

--enjoy it all. ... Now girls ! Splash away ! ... And
splash away they do ! A frothy finish!
