(5). TITLE.:- AVIATOR & MOTORISTS.

Picture.:- The motorists get a generous start, --

--but the plane soon gets to work, regaining the --

--laps conceded to the land vehicles. ... One after --

--another the cars and bikes are passed, and --

--their going gets more difficult as the snow and --

X --ice gets churned up, and turned into slush. ... We've
seen --

--horse-racing on the ice, but this is about the --

--first time a race of this kind has --

--been staged. ... Round they go and - he's off !

Ha ! hope they're carrying life-belts ! ...

The going's jolly hard in some parts, and slows up the
roadsters. ... The plane is doing a hundred-miles --

--an hour, which is lightning compared with the crawl --

--some of the ground machines are forced to. ... That's why--

--the aeroplane wins the race !
