

(8). TITLE.:- RIDING TO SAFETY.

Picture. :- It would be almost a pleasure to be --
--rescued from fire by this novel device. ... It is --
--run up the escape on a sledge-like affair, --
--pulled by a cable attached to the --
--fire engine below. ... The "victim" then enters the car,--
--and settles down comfortably, for the good work of --
--rescue to be carried on, with no more excitement or --
--risk than a trip in a tube lift !

Eager hands await the contraption at the bottom.

α Possibly this young lady would have preferred the old fashioned method of rescue ! Who knows ?
