

J-PS2581

(4). TITLE:- GOING UP !

Picture:- The worst part of ski-ing is that it entails  
a --

--strenuous climb before you can have the thrill of the--

--downward run. ... The climbing is done for these people. ...

How much easier it is to climb the mountains this way, --

--and get to the top still full of energy. ... Some --

--of the sportsmen get a lot of fun out of --

--the upward run, - "caterpillar ski-joring" - as it were !

It's "sport made easy", in the 1931 style !

They're near the top - all as fresh as paint ! ...

Now that they've made the climb so effortless, one rather--

--wonders if this particular sport won't lose much of its  
attractiveness. ... A thrill that's--

--not worth an effort, isn't very much appreciated, as a general  
rule.
