

(8). TITLE.:- ITALY'S CARNIVAL.

Picture.:- They always do this grand annual carnival in a big way ! ... Wierd and wonderful floats and figures attract big crowds, who line the streets gazing, with amazement, --

--at the remarkable creations which are paraded for their amusement. ... This show rivals the Nice carnival in the originality displayed by the designers of the floats, each of which carries scores of prancing and jigging figures. ... They are not --

--all grotesque. ... For instance, see this beautiful one representing "Pearls of the Adriatic". As pretty an affair as one could wish for in a street procession.

Original caricatures of modern life are represented by these giant figures. ... Records do not say who, or what they are !

"The tropics" are represented by this striking car. ... The trouble and expense they go to, to make the floats attractive is really rather wonderful. ... This big carnival attracts a --

--lot of visitors to Viareggio, and the whole town gives itself over to a feast of fun and jollity seldom equalled anywhere else in the world.
