(5).

TITLE.:- ALL CLEAR.

Picture.:- Once upon a time ! - (Sounds like a fairy tale !)  
they used to control movements --

--of trains by means of this --

--complicated signalling gear. ... But --

--now, those hefty levers and big girder gantries --

--are giving way to a simple system of electric --

--signalling. ... Movements of trains are constantly under  
the --

--eyes of the operators, by means of these electric charts. ...  
The --

--levers are nothing more than switches. ... When --

--these are put over, the signal --

--lights change from red to green, --

--the necessary points are moved, and --

--all is clear for the safe passage of the iron monster and  
its valuable freight. ... The --

signal lights will penetrate fog, --

--and are clearly visible in --

--strong sunlight ! ... All this means, faster and safer  
British railways !
