TITLE:- MAGNETIC PICK-UP.

Picture:- They're more attractive than all the beautiful things you ever heard of in this life ! ...
When the electric --

--current is switched on, all the bits of iron and steel jump into life and attach themselves with glue-like tenacity to mighty magnets. ... Each piece communicates its power of attraction to the next piece, and there they hang, while the crane raises the whole affair, and then proceeds to --

--dump it where it is wanted. They've got --

--it well trained, too ! ... See how it tidies up after the day's work ! ... I shall have to send our maid to see this picture !
