

(7). TITLE:- SNOWED UP.

Picture:- Snow-time is slow-time in Slovakia ! ... Public services are reduced to a crawl --

--and often to a stand-still. ... Trains run just as the time-tables are HOT ! In fact many don't --

--run at all, after the --

--first mile or so.

... They run into snowdrifts, --

--and there they have to stay --

--while detachments of troops get to work with shovels to clear --

--a way for them. ... It really means, that --

--if you've got to get somewhere quickly, you just stay --

--at home - and think out excuses for not going until next week!

By that time, you hope, the time-tables will be telling the truth once again !
