

(5).

TITLE:- MILADY'S WEAR.

Picture:- Once again Dame Fashion dictates what women shall, and shall not, wear. Seems to me she changes her mind --

--all too often ! First milady may - and as soon as she does - she may not !It's all good for business, but--

--pity the poor husbands ! Designers are certainly "letting themselves go" over the smart wear they're creating to brighten the seaside places this year.

Er-yes ! I shouldn't be surprised if some of us take longer holidays than usual - if our favourite resort offers attractions such as these !

..... I often wonder why women (who are charming in themselves) - um - well, now if I attempt to tell you about some garments, a certain person of my --

--acquaintance would want to know the how, when, where, who why and which of it all - and then I'm sure she wouldn't believe a word I said: perhaps she'd be right, too ! The things --

--you saw just now, are out to preserve the slim hip-line - so they tell me !

Frocks are long enough to cover a multitude of shins nowadays. Altogether boys, "Shame" !
