

(1). TITLE:- GOING UP ?

Picture:- Of course, they take a "flying start" - and here's why ! But gravity says, No !

It's easier going down !

They call it a hill-climb.

It seems to me that thrill climb would be a more fitting name for it!

You can't expect to defy the laws of gravity in this way, and get away with it !

Come on up, you two ! Now for the rise ! The going's good ----- but not good enough !

It's a wonder they don't somersault to the valley below.

There's one thing, you can't "skid yourself" over this track. It's all done for you !

Here's a good dive - er-drive ! Up, up -- er, no more "up" - it's down !

Another grand effort ! Away they go ! Good work - er, no - the "bus" develops that "Monday morning feeling", and backs out !
