

(5).

TITLE.:- COMING DOWN TO EARTH.

Picture.:- It's all that is left of a big beer brewery.
Of course, --

--they've no use for such places in America now !
The chimney used to be a land-mark - but as --

--they've stopped advertising where beer is made, it has
to be --

--removed. An automatic drill shivers itself
into the base --

--and the great two-hundred-foot structure sways and
topples, like a man who has had "one over the eight".
Down - she - comes ! Crashing to earth in three seconds -
in one three-millionth-part of the time she took to build.
