

(2). TITLE.:- GUN RUNNING.

Picture.:- The British Navy actually encourages "gun-running" - of this sort. Boys of His Majesty's Ships Victory and Excellent enter into these races --

--with zest, and thoroughly enjoy themselves. Up goes the spar, --

--and with almost lightning-like rapidity two of the team swing across --

--followed immediately by the wheels of their gun.Then the gun --

--itself. The whole operation is an exhibition of smartness in which they take pride.

Now the gear is dismantled, and the teams set --

--about hauling the guns to the finishing post. In this case Excellent's team - (in the distance) - were first.

Here they are ! "Boys of the Bull Dog Breed" every mother's son of them, --

--while here is the vanquished team of the Victory. Better luck, next time, boys !
