(7).

TITLE.:- HIGH TIMES.

Picture.:- It's the newest thing in fire-escapes, with many advantages over the old type of machine. ....

The numerous dials and gadgets suggest that firemen have to be engineers as well to-day.

This demonstration is for the benefit of the York Watch Committee, who --

--are not above taking a leaf out of another city's book, if it means--

--progress. .... This one is ordered for Nottingham. .... It shoots up into the air, carrying a --

--fireman to its full extent. .... Comparison with the old rose window of the historic Minster, shows how --

--useful it will be for fighting fires in tall buildings, or even in buildings behind others, for they'll be able to get over the top to them.

It extends to 85 feet - that's tall enough for pretty well --

--any purpose. .... The firemen have got some high times in store !
