

(2).

TITLE:- SAFETY LANE.

Picture:- Motorists who want to test their cars before taking them on to --

--the ordinary roads are given this opportunity of doing so in--

--absolute safety. The benefit of expert advice is free. At seven --

--points the cars are checked, so that a driver knows all about his car --

--before he pays the second instalment !

In three days over two-thousand car-owners --

--availed themselves of "Safety Lane", as they nicknamed this road. I'd hate --

--to think how many --

--arguments between buyer and seller it caused.

It's always as well --

--to know all you can about --

--the car you're driving, --

--for the mobile police may be keeping a wicked eye on you ! Well, they'll have to serve the summonses in hospital !
