

(10). TITLE.:- NOBLE ART.

Picture.:- Young ladies of University College believe in fighting the common enemy of femininity - embonpoint - with the foil. Now that --

--Dame Fashion demands slim and svelts figures, they redouble their efforts to foil the ever-present spectre of plumpness,--

--although they don't look as though they have much to worry--

--about. I can't say their guards improve their appearance, but they can't take too --

--many risks. Professor Parkins, the famous English fencing master, victor in scores of matches, --

--teaches his pupils all the tricks of the noble art.

They all realize the wonderful "reducing" value of the exercise required of them during this lesson.

How they watch their weight - and smile when --

--it's down ! They'd rather lose a couple of pounds, than a ten bob note !

This young lady is Miss Desprey - one of the cleverest--

--exponents of the art ! She's a great believer in it. Here's the reason ! Ladies, if you want to get out of the "outsized" department, why not learn the art of defence ?
