(2).

TITLE.:- SWIMMING DEVICE.

Picture.:- Here's a new one ! Pedals turn the little propeller at 720 --

--"revs" a minute giving a speed of three-miles-an-hour in the water.

You can't fail to "keep your end up" with this "what-d'you-call-it". Even if you --

--don't want to swim, you just turn the crank, and become an outboard motor-boat !

It'll most likely prove a "spoil sport", for the prettiest --

--girls will be teaching themselves to swim now !
