(8).

TITLE.:- WEIGHTY CARGO.

Picture.:- Each of them weighs over 35-tons, with tender. ...
A very heavy cargo for any ship

They are all fitted with cowcatchers - which, in English,
means "Excuse me !"

Getting them aboard is a tricky business in such a limited
space. It would be quite easy for something to go
wrong, with disastrous consequences to somebody.

However it doesn't, so all's well. Altogether
there's about --

--a couple of thousand tons to be carried this trip.
As they are settled --

--into position on the deck, there's hardly an inch between
them. One might be inclined to refer to them as
being packed together like sardines, but the --

--and ones hang over the sides, so it's much more like six-
in-a-bed !

. There's a long journey ahead of them - let's
hope the good ship "Belpamela" doesn't meet with dirty weather,
her responsibility is very heavy !
