

010).

TITLE.:- SHEEP TO SUIT.

Picture.:- The sheep-shearers are "all set" for the word "Go", --  
--and, how they go on the word ! ..... After shearing the --  
--wool goes through the process of Teazing.

Lady Campbell, whose husband was the cause of this grand  
hustle, --

--watches the whole operation. .... Now they are dyeing  
the wool, preparatory to --

--"Carding". .... Into the Hopper it goes, to come out --  
--on the other side, in the form of a thread.

Then comes the Spinning, which, in turn, is followed by --  
--the process known as Warping. ....

Now it is woven into cloth ! ..... Ninety minutes ago  
it was growing wool !

Scouring, Milling and Drying are made --  
--short work of, and, at last, the cloth is ready --  
--to be dashed off to the tailors.

BRING UP CHEERING CROWD TO END OF SHOT.

Sir Malcolm Campbell challenged the British industry  
to turn living wool into a suit --

--in less than America's record of six-and-a-half hours. ....  
Well, you have --

--seen it done, with buttonholes complete, in the perfectly  
amazing --

--time of two hours, nine minutes. ....All steam pressed  
and ready to wear !

And now let me present Lady Campbell, wife of the  
"fastest man on earth", with the world's fastest suit.

It is to be worn by Mr. J.H. Thomas at the Imperial  
Industries Fair at Bradford.
