

(6).

TITLE.:- CASK ROLLING.

Picture.:- They rather remind one of our railway porters trundling milk urns to and from the early morning trains. .... A lot of wine is consumed in France, and this means that large numbers of casks have to be trundled from time to time. .... Hence these competitions which serve to urge the porters to speedier work with them. .... It needs a skilful eye to keep them rolling around on their edges. .... You try it with your water-butt when you get home - but mind your toes ! .....

The winner gets a whole cask of wine. .... I should think he could do with it, too, after this spell of warm work. .... And you can --

--be quite sure his fellow competitors won't wait for him to say "what'll you have ?"
