

(4). TITLE.:- MODERN WOODSMEN.

Picture.:- Now that America has forbidden the importation of Russian wood lumber, believing that it is --

--cut by convicts, the home lumber camps are knocking up a healthy pay sheet. Not long ago teams of 8, 12 and 16 horses --

--hauled these tremendous logs which are now moved by these special --

--caterpillar tractors. The saving in man and animal labour enables half a --

--million feet of timber to be harvested each season. Powerful cranes lift trunks --

--of great girth, and stack them as easily as we --

--lift a pen to increase our overdraft. When the Soviet started --

--dumping logs, the lumbermen had a --

--poor time, and left the forests to come to the cities to look for new jobs.

Then the States Government stepped in, and the lumber towns woke up to prosperity again. This --

--hill has its uses, too. A little encouragement and these forest giants crash into --

--the flume, to take their trip to the sawmills and the workshops. Now Mr.Macdonald, what about British wood for British buildings ?
