

(4).

TITLE.:- PROFESSOR PICARD.

Picture.:- All the world wants to know about the Professor's expedition into the upper air. He arrives at Le Bourget to tell the French people what --

--it is like to drift over the earth ten miles up in a sealed --

--metal ball attached to a balloon. The Professor has not the appearance of an adventurous explorer, but he took even greater --

--risks than many more romantic-looking "spirits of adventure". The records secured on his perilous exploit --

--are invaluable to those interested in such things.
