

(7). TITLE.- PRESSIANS AT PLAY.

Picture.- The "armoured" cars wouldn't "stand up" to much, for they are --

--actually made of paper !

But their bikes are, of course, more substantial !

Car-drill, by numbers, is quite a novel and showy idea.

Machine gun contests put them "on their metal", and give the audience the thrill of watching a little battle --

--without any of the horrors attendant --

--on the real thing !

We've had enough of that !

They get quite a lot of fun --

--out of the various sports competitions. Swish !..... Missed him !

"Motor-batics" give them a chance to "show off" their abilities, --

--while "mobile bar" work is exciting for performer and audience.

Now some of you young fellows with motor bikes, have a go at this !

But you'll be well advised to choose your passengers carefully --

--in case anything goes wrong !
