

(3). TITLE.:- AERONAUTICAL THEORY.

Picture.:- Mr. McKinney says that no human has ever flown yet !

And here's how he explains his startling assertion, with --

--the help of Daisy, his daughter. .... He says you--

--don't claim to swim when you take a trip in a submarine - so why --

--should you claim to fly when you ride in an aeroplane ? .... "Birds have the right idea", says he, "and until we can do just as they do, we are just where we were --

--so far as flying is concerned." ..... There's something in what he says, --

--but I wonder if Daisy agrees. .... Of course, she's --

--got wings earlier than most - but she's an "angel" for helping Dad.
