

(5).

TITLE:- MANOEUVRES IN MINIATURE.

Picture. :- They can't afford to have big manoeuvres this --  
--year, so they're "keeping their hands in" for the "war--  
--game" with individual regimental exercises. .... This is --  
--the 10th Cavalry approaching a river which has --  
--to be crossed with horses and equipment.

The troops dismount at the water's edge, --  
--strip their horses, and pack everything ready for the --  
--pontoons which are to transport them across --  
--the river Oder. .... In small groups the horses enter --  
--the water, the equipment is put in the rubber boats, --  
--and it's, Ho !, for the distant shore ! .... Each  
pontoon --

--has about six horse power to help it on its way.

There's plenty of "kick" about this means of  
propulsion ! ....

In fact it is the "kick" that gets them there !

Safely across, and we'll leave them to get on with  
their little war.
